

SAFE AND WELL VISITS

To promote fire safety at home, Hampshire Fire and Rescue are offering newly tailored Safe and Well visits. With a fire safety focus initially, these visits allow the occupier to get fire safety advice and ensure they have smoke detection. In addition to this, Hampshire Fire and Rescue have teamed up with the NHS, and are offering an inclusive visit to identify any support needs the occupier may have. These support needs may be fuel poverty, mobility or health difficulties. Falls assessments' can be completed for the occupier if this is relevant, and any other needs identified can be signposted to the correct agency. With this joined up working approach, agencies can identify people who are potentially at risk of having a fire, but also people who are risk of having a fall, or struggling with no heating in the winter, and get them the support they need.

It's really simple to refer someone you are working with, go to the Hampshire Fire and Rescue website [Hants Fire & Rescue](#) and head to the keeping safe section, looking for "Safe and Well", or follow this [link](#). If you want to talk it through with someone first that's ok too – just give them a ring on 023 8062 6809.
